

### SOLUTION OVERVIEW

#### TARGET AUDIENCE

Businesses & Organizations that...

- need projects completed within cost and schedule constraints while maintaining or improving product quality.
- desire to manage their resources more effectively and efficiently across multiple projects.
- desire the necessary discipline and repeatable methodology to successfully manage their projects.
- need to manage multiple projects across their enterprise.
- desire accurate performance measures for their projects.

#### SCENARIOS

- Projects often are late-to-market and over-budget.
- Program/Project Managers and staff are overwhelmed and need support.
- Senior and Executive management cannot easily determine the current status of projects within the organization.
- Resources and skill sets within the organization are not utilized efficiently.

#### EDWARDS PROJECT SOLUTIONS

- Enterprise Portfolio Management
- Project Management Services
- Project Management Tools
- Project Management Training
- Systems Engineering Design Solutions
- Technical Program Management

### SATISFIED CUSTOMERS INCLUDE

Amtrak  
BAE Systems  
Becton, Dickinson and Company  
CACI International, Inc.  
Centers for Medicare and Medicaid Services  
DoD Joint Spectrum Center  
Executive Office of United States Attorneys  
Federal Aviation Administration  
Federal Bureau of Investigation  
IBM Global Services  
Johns Hopkins Applied Physics Laboratory  
Keane Federal Systems  
NASA/Goddard Space Flight Center

ON TARGET ON TIME ON BUDGET

### PROJECT MANAGEMENT SERVICES

*Project management is a discipline – and disciplined project management produces successful results.*

Whether establishing and supporting a complete project management office (PMO), developing or revising project management policies and procedures, implementing a project management methodology, creating and managing a full life cycle program, or rescuing a failing project, discipline is paramount to success. From project planning, scoping, and scheduling to project execution and tracking, including earned value project reporting, we offer project management support throughout the project life cycle.

- Enterprise Portfolio Management
- Custom Project Management Methodology Development or Enhancement
- Project Management Best Practice Implementation
- Project Management and PMO Support Services
- Project Planning, Scheduling, Execution, Analysis
- Project Evaluation and Rescue

### PROJECT MANAGEMENT TRAINING PROGRAMS

*The most effective training programs are those that integrate the best of theory with practical real-world experiences.*

Our training programs combine theory and real-world experiences to create comprehensive courses in project management theory, principles, practices, and toolsets. These courses, designed around project management “best practices” and based on the PMI® PMBOK® Guide, are taught by experienced program and project management professionals with the insight to manage real-world situations and projects.

- General Project Management Principles
- Project Management Professional (PMP) Certification Preparation
- Earned Value Analysis and Management (EVA/EVM)
- Risk Analysis and Management
- Project Planning and Scheduling
- Microsoft® Project (Standard, Professional, Server) Tools Training

### SYSTEMS ENGINEERING DESIGN SOLUTIONS

*Systems engineering design solutions based on a structured Systems Development Life Cycle (SDLC) engineering approach.*

Whether implementing a solution for individual use, a workgroup, or for the entire enterprise, our services and solutions are designed, developed, implemented, and sustained based on a structured Systems Development Life Cycle (SDLC) approach. From Planning and Requirements Analysis to Design and Development to Integration, Test, and Implementation to Systems Operations, our phased SDLC approach incorporates industry “best practices.”

- Enterprise Project Management / Enterprise Resource Planning (EPM/ERP)
- Microsoft® Project Enterprise Implementations
- Software Systems Design and Application Development Support
- Systems Engineering and Technical Program Management

# EDWARDS PROJECT SOLUTIONS

CLIENT PROJECT SUCCESS<sup>SM</sup>  
ON TARGET  ON TIME  ON BUDGET

- ◆ Are your projects often late-to-market and over-budget? ◆ Are your program/project managers and staff overwhelmed and in need of support? ◆ Can Senior and Executive management easily determine the current status of projects in the organization? ◆ Are resources and skill sets within the organization utilized efficiently?

---

EDWARDS PROJECT SOLUTIONS is a full-service project management and systems engineering firm focused on the application of sound project management principles, project management training, and systems engineering disciplines. With multi-tasking more common than ever, and more projects with shorter durations, organizations need methodologies, processes, disciplines, and toolsets to effectively manage the variety of resources and skill sets that flow in and out of projects. Additionally, organizations need to provide accurate, real-time status reports on these multiple projects to both inside and external stakeholders. Edwards Project Solutions, cognizant of this critical and growing requirement in the marketplace, is focused on providing support, training and systems engineering solutions based on a centralized “Edwards Methodology” for structure-disciplined project management. This centralized methodology allows Edwards Project Solutions to provide a holistic, full-service, and cost-effective project management solution to its customers. Edwards’ project management support services and solutions enhance a company or organization’s ability to manage the resources they assign to multiple projects, pinpoint exact project status, and accurately report performance measurements.

*Project Management is a discipline – and – disciplined project management produces successful results.*

Whether establishing and supporting a project management office (PMO), developing or revising project management policies and procedures, implementing a project management methodology, creating and managing a full life-cycle program, or rescuing a failing project, discipline is paramount to success. From project planning, scoping, and scheduling to project execution, tracking, and reporting (including project earned value metrics), we offer disciplined project management support throughout the project life cycle.

*The most effective training programs are those that integrate the best of theory with practical real-world experiences.*

Our training programs combine theory and real-world experiences to create comprehensive courses in project management theory, principles, practices, and toolsets. These courses, designed around project management “best practices” and based on the PMI<sup>®</sup> PMBOK<sup>®</sup> Guide are taught by experienced program and project management professionals with the insight to manage real-world situations and projects.

*Systems engineering design solutions based on a structured Systems Development Life Cycle (SDLC) engineering approach.*

Whether implementing a solution for individual use, a workgroup, or for the entire enterprise, our solutions are based on a structured Systems Development Life-cycle (SDLC) approach. From Planning and Requirements Analysis to Design and Development to Integration, Test, and Implementation to Operations, our phased SDLC approach incorporates industry “best practices.”
